Profile

An **AI Product Leader** who quickly maps how an industry and its products work, frames problems no one has yet put into words in the language of technology, and carries them through to product and business results.

Across fintech AutoML, medical computer vision, e-commerce LLM applications, and generative AI video, I have delivered a consistent track record: building teams from scratch, growing MRR 10x, closing enterprise contracts, and taking a web product to official launch.

Entering a new domain, I first map the product's infrastructure, systems, and market to find the gaps nobody has defined. Problems tightly coupled to core systems, I raise to the level of an organizational agenda; friction that can be validated independently, I prototype myself. I don't stop at implementation. I execute with the team until real outcomes land: signed contracts, payment conversion, and users reaching their first satisfactory output along the Golden Path.

Skills

AI Product Leadership

- Product Strategy & KPI/OKR
- Product Discovery & Hypothesis Validation
- Cross-functional Leadership & Team Building
- B2B GTM

AI Systems

- LLM Applications & Agents
- Context Engineering & AI Evals
- Generative Media & Computer Vision
- Model Routing & Integration

Technical Execution

- Rapid Prototyping
- System Architecture
- API Design
- SQL & Product Analytics

Work Experience

AI Tech PO, AI LAB

Cinamon (CineV)

April 2025 – Present

- Proposed sunsetting a three-year legacy 3D pipeline and won organization-wide buy-in; rebuilt the product as a generative-AI web product in **6 months** and took it to official launch.
- Researched **conditioning** and **context injection** for generative models, validating hypotheses on **120+ controlled same-scene cases**; shipped an **asset management system** for visual consistency into the product.
- Shipped **3 experimental features**; drove **2 model integrations** and **6 user studies** through an in-house eval platform.
- Introduced an external model routing layer, integrating **30+ models across 7+ capability areas** into the product.
- Ran **13 AI literacy and visioning sessions**; designed and operated a web-team-led Product Discovery program.

AI Product Manager, Head of AlaaS Product Team

BUZZNI (Homeshoppingmoa)

April 2023 – March 2025

- Led both business development and product development as team lead; restructured a **20-person organization** and built the AlaaS product lineup along with its pricing, contracting, and settlement framework.
- Signed **13 new enterprise clients**, growing MRR **10x+** from **KRW 5M** to **KRW 52M**.
 - Hyundai Home Shopping, Shop&T, Shinsegae Live Shopping, CJ ENM, AboutPet, Pulmuone, KT Alpha Shopping, Wendy Media, KT Commerce, SK Stoa, SK Broadband, W Shopping, GS Shop
- Planned, launched, and operated a new B2B2C AlaaS service, generating **KRW 24M in new MRR**.

Elementary

Korean

Native

- Packaged in-house AI models into AlaaS products and ran them to **KRW 28M MRR**.
 - Authored press releases and organized external events (AI EXPO, AI SUMMIT, speaking engagements, etc.).
-

Business Operations Manager

Dasan E&E

June 2022 – March 2023

- Automated the Assessment Center task development process with LLMs, applying AI domain expertise to restructure a manual workflow in the HR consulting field.
 - Rebuilt operational processes and established a strategy execution framework, supporting the company's turnaround.
-

AI Product Manager, Lunit SCOPE Team

Lunit

January 2022 – April 2022

- Led early-stage product planning for vision-model-based biomarker analysis software (HER2, ER/PR).
- Authored PRDs for new products and FDA/CE regulatory documentation for existing products.

(Reason for departure: stepped away to support the turnaround of a family business.)

AI Product Manager, Senior Manager, New Business Planning

Solidware (now Ailys)

December 2018 – December 2021

- Built the product and business for an AutoML-based fintech MLaaS offering and opened the Japanese enterprise market.
 - Signed 13 clients including Mitsubishi and AEON; **doubled annual revenue** and grew sales contact points **256%**.
 - Secured **KRW 1.5B** in government-funded projects.
 - Owned proposal writing end to end for all public grant programs.
-

Education

Tsinghua University (Beijing, China)

B.A. in Journalism (Media Statistics), GPA 3.78 / 4.00

Awards

- Outstanding Graduation Thesis, Department of Journalism (2016)
 - Beijing Municipal Government Scholarship for Outstanding International Students (2013, 2014, 2015)
-

Achievements & Recognition

Award Chroma Awards — Sponsor Award, Top 11 Finalist (2025)

- Selected as a Finalist at one of the world's largest AI film festivals. Work: <Happyend>

Hackathon ElevenLabs Worldwide Hackathon (2025)

- Built a multi-persona agentic AI role-playing project at the ElevenLabs global hackathon.

Hackathon Meta Llama Competition — 3rd Place (2024)

- Took **3rd place** in the Meta Llama competition with work on improving text-to-video retrieval performance.

Publication Korea Software Congress (KSC) — Oral Presentation Accepted (2023)

- <Analysis of Korean Question-Answering Comprehension Based on ChatGPT>

Patent 3 AI-Related Patents Registered · 3 Applications Pending

- Method and apparatus for interpreting machine learning prediction results based on variable influence
 - Method and apparatus for incorporating user intent in unsupervised learning
 - Method and apparatus for generating a supervised learning model derived from unsupervised learning methodology, and method and apparatus for interpreting unsupervised learning models using the same
 - *3 additional applications currently under examination*
-
