Profile

I am an AI Product Leader who finds the greatest energy in **applying AI to new industry domains**.

I began my career as an AI PM by selling an AutoML solution to major Japanese corporations in the fintech domain. Since then, I have built a biomarker analysis software platform in healthcare, developed an LLM-powered short-form video editor and a shopping chatbot in e-commerce, and am currently architecting a video production pipeline that integrates generative AI with 3D motion technology.

Tabular ML → Computer Vision → LLM Agent → Motion AI — with each transition, I have expanded into new technologies and domains while consistently delivering results: building teams from the ground up and growing MRR by 10x.

I believe the role of a Product Leader is to cover every dimension of identifying and solving the **"problems"** that determine a product's success. Beyond product planning, I operate as an **End-to-end Problem Manager** — building internal tools through hands-on prototyping, engineering prompts, standing in front of customers to sell, and structuring teams.

Skills

AI/ML

- LLM Agent
- Context Engineering
- AI Evals
- Generative AI
- Computer Vision
- Motion AI
- AutoML

Product

- AIaaS
- Roadmapping
- PRD
- Cross-functional Leadership
- Team Building
- Agile/Scrum

Technical

Work Experience

AI Tech PO, AI LAB

Cinamon (CineV)

April 2025 – Present

- Designed a LangChain-based Film Agent, achieving end-to-end LLM-to-Unreal Engine integration.
- Accelerated the model-to-product integration cycle via a Motion AI Evaluation (User Study) platform — achieving 2 new model integrations (Locomotion, Text-to-Motion) within 5 months post-launch, compared to 2 integrations over the prior 2 years; conducted 6 user studies in total.
- Defined an off-the-shelf model integration strategy: integrated a model routing platform, reducing the external model deployment cycle from days to near-instant, while architecting I2V, I2I, TTS, and Music Gen pipelines and leading API design.
- Established the CineV product launch strategy and led the AI division. (Official launch: January 2026)

AI Product Manager, Head of AIaaS Product Team

BUZZNI (Homeshoppingmoa)

April 2023 – April 2025

- Vibe Coding, Prototyping
- System Architecture
- API Design
- SQL
- GA
- Figma
- Linear
- LangChain/LangSmith

Portfolio

🔗 Jay Ko | AI Product Leader

- Served as team leader for both business development and product development, overseeing organizational structure and product portfolio.
- Achieved **MRR growth of over 10x** (KRW 5M → KRW 52M).
- Acquired **12 new enterprise clients**:
  - Hyundai Home Shopping, ShoppingNT, Shinsegae Live Shopping, CJ ENM, AboutPet, Pulmuone, KT Alpha Shopping, Wendy Media, KT Commerce, SK Stoa, SK Broadband, W Shopping, GS Shop
- Planned, launched, and operated 2 new B2B2C services:
  - E-commerce shopping assistant chatbot; Long-form to Short-form AI video editor (**MRR KRW 24M**)
- Defined API interface policies for proprietary models and led PMO for AIaaS productization and integration development:
  - E-commerce search engine, review analytics engine, category classification model, catalog model, etc. (**MRR KRW 28M**)
- Built and restructured a 20-person team, establishing the organizational foundation for business scale-up:
  - Clarified roles and responsibilities through cross-departmental reallocation and targeted hiring; designed task management frameworks.
- Designed AIaaS product lineup and pricing strategy; managed contract negotiations and revenue settlement.
- Authored press releases and organized external events (AI EXPO, AI SUMMIT, external speaking engagements, etc.).

Business Operations Manager

Dasan E&E

June 2022 – March 2023

- Drove operational efficiency improvements by applying LLM-based automation to the Assessment Center task development process in the HR consulting domain — demonstrating cross-domain application of AI expertise to an unrelated industry.
- Restructured operational processes and established a strategic execution framework, supporting the successful management normalization of the business.

AI Product Manager, Lunit SCOPE Team

Lunit

January 2022 – April 2022

- Led early-stage product planning for a vision model-based biomarker analysis software platform (HER2, ER/PR).
- Authored PRDs for new products and contributed to FDA/CE regulatory documentation for existing products.

AI Product Manager, Senior Manager, New Business Planning

Solidware (now Ailys)

December 2018 – December 2021

- Served as PM for an MLaaS service in the fintech domain.
- Acquired **13 new enterprise clients** (MLaaS).
- Achieved **100% YoY revenue growth** and a **256% increase in sales contact points**:
  - Led new module development for an on-premise AutoML solution and executed go-to-market strategy including offline seminars and AI EXPO TOKYO. Key clients: Mitsubishi, AEON, Japan Post Bank.
- Secured government-funded projects totaling **KRW 1.5B**:
  - Managed end-to-end proposal writing for multiple public R&D grants (Global SW Support Program, SW High-Growth Club 200, Seoul Post-COVID AI Support Program, AI Voucher ×3).

Education

Tsinghua University (Beijing, China)

B.A. in Journalism (Media Statistics), GPA 3.78 / 4.00

Awards

- Outstanding Graduation Thesis Award, Department of Journalism (2016)
- Beijing Municipal Government Scholarship for Outstanding International Students (2013, 2014, 2015)

Achievements & Recognition

`Award` **Chroma Awards — Sponsor Award, Top 11 Finalist (2025)**

- Selected as a Finalist at one of the world's largest AI Film Festivals. Work title: <Happyend>

`Hackathon` **ElevenLabs Worldwide Hackathon (2025)**

- Participated in the ElevenLabs global hackathon with a project on multi-persona agentic AI-based role-playing.

`Hackathon` **Meta Llama Competition — 3rd Place (2024)**

- Competed in the Meta Llama Challenge focused on improving text-to-video retrieval performance; awarded **3rd place**.

`Publication` **Korea Software Congress (KSC) — Oral Presentation Accepted (2023)**

- <Analysis of Korean Question-Answering Comprehension Based on ChatGPT>
  Eunhwan Park · Sungwook Nam · Donghoon Han · Keunyoung Jung · **Jaehyun Ko** (BUZZNI AI Lab), Seunghoon Na (Jeonbuk National University)

`Patent` **3 Machine Learning-Related Patents Registered (2020)**

- Method and apparatus for interpreting machine learning prediction results based on variable influence
- Method and apparatus for incorporating user intent in unsupervised learning
- Method and apparatus for generating a supervised learning model derived from unsupervised learning methodology, and method and

apparatus for interpreting unsupervised learning models using the same
